

3YC FLEX DISCOUNT

Applying a 3YC Flex Discount

An end-to-end visual walkthrough from a customer's first order, error handling through through additional purchases to auto-renewal, with the API used at each step.

What this walkthrough covers

How a 3YC (Three-Year Commit) discount is applied across the full customer lifecycle and which API powers each step.
each step.

01

First order

Apply the discount on a 3YC customer's initial purchase including the eligibility gate that blocks customers who aren't yet enrolled.

02

Additional purchases

Re-apply the same reusable code on later orders for the same customer.

03

Auto-renewal

See the discount apply automatically at renewal with no code passed at all.

Discovery is powered by the [Get Flex Discounts](#) API; eligibility and pricing are validated by the [Preview](#), [Create Order](#), and [Preview Renewal](#) APIs.

SECTION 01

Discover the discount

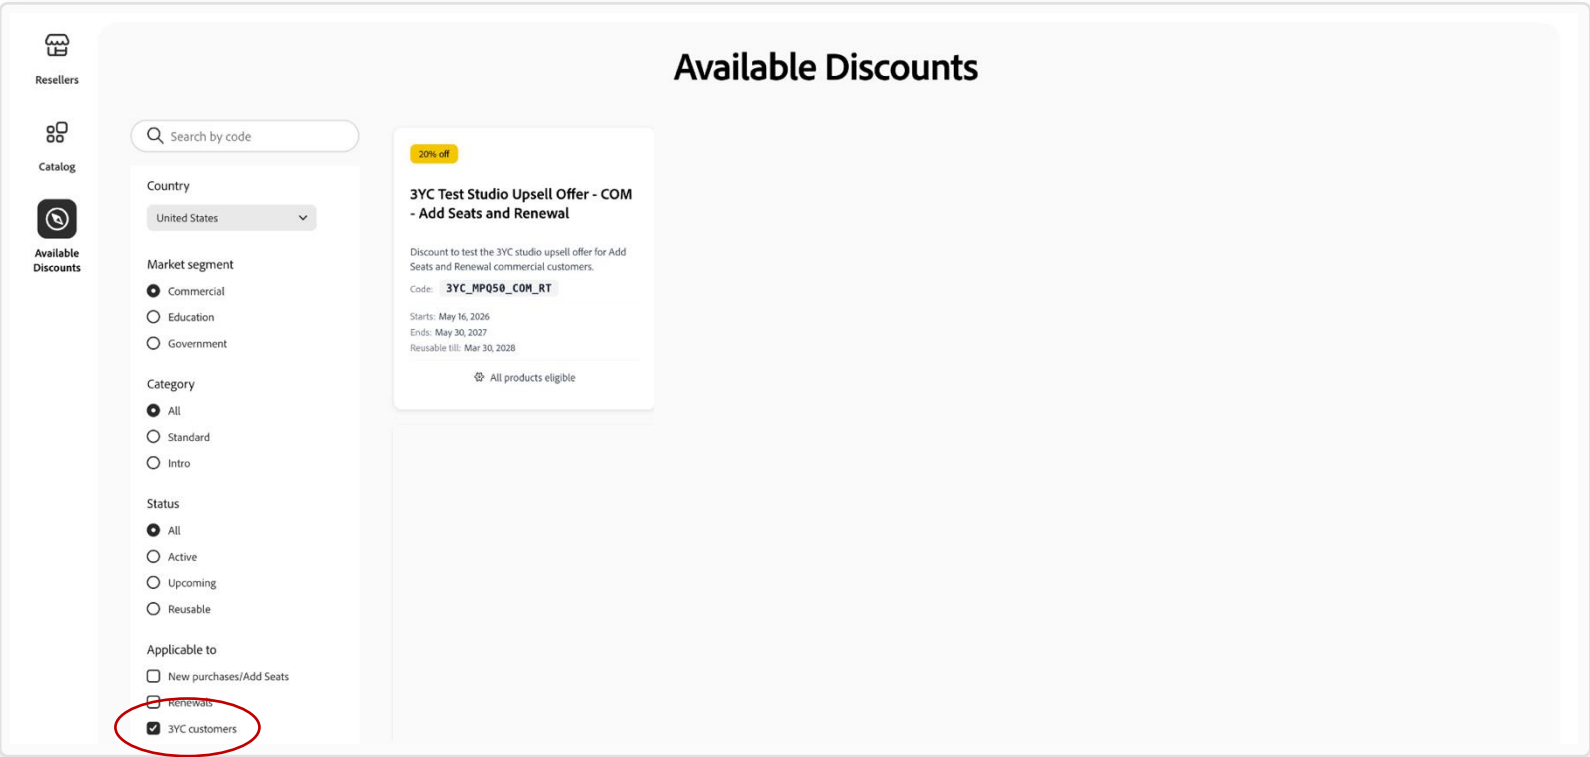

Find the codes available to the partner and isolate the 3YC offers.

DISCOVER

Find available discounts

Use the Get Flex Discounts API to pull every discount available to the partner.

Filter by name to isolate 3YC offers — the encircled check matches any discount whose name contains **“Three-Year Commit”** or **“3YC”**.

API [Get Flex Discounts](#)

SECTION 02

First order for the customer

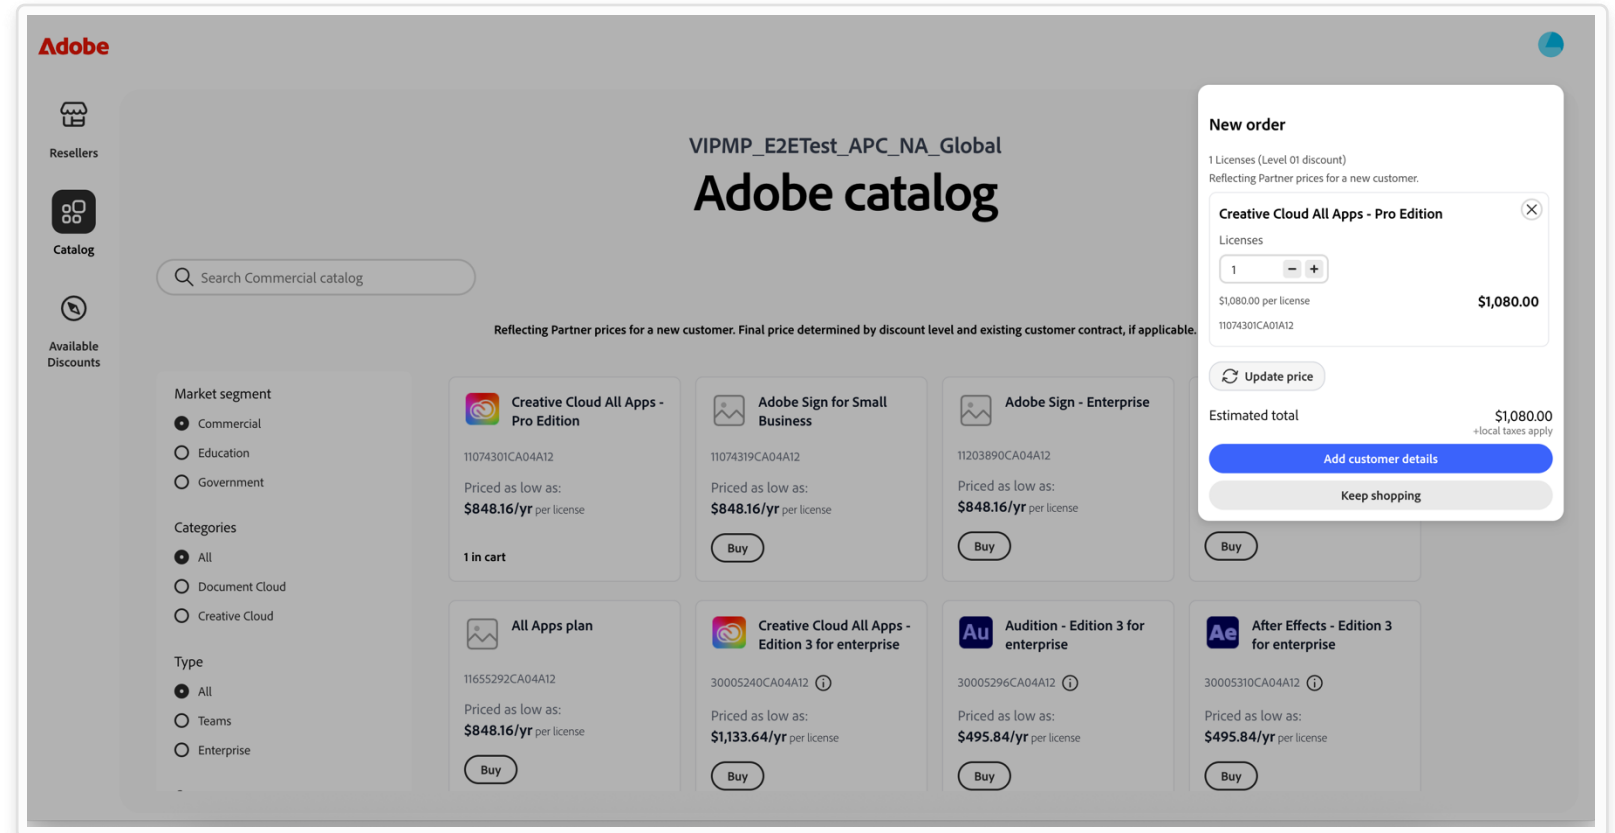

Place an order and attempt the 3YC discount — first for a customer who isn't yet eligible.

FIRST ORDER

1

Start a purchase from the catalog

Begin an order for the customer from the Adobe catalog. At this point the customer may or may not meet the 3YC eligibility criteria — we'll first walk through what happens when they don't.

FIRST ORDER

2

Add the order details

Enter the customer and product details to build out the order before moving to checkout.

The screenshot shows the Adobe Commerce interface with a modal titled "Add customer details". The modal has two tabs: "Find an existing customer" (selected) and "Create a new customer". Under the "Find an existing customer" tab, there are two search fields: "Search Reseller by name or ID *" with a dropdown menu showing "Haney-Scott", and "Search customer by name or ID" with a dropdown menu showing "CodeGen". Below these fields, the modal displays customer information: "Customer name: CodeGen", "Customer ID: 1007498579", "Anniversary date: 06/22/2027", and "Reseller ID: 1000451203". At the bottom, there is a section "Make licenses available:" with two radio buttons: "Now" (selected) and "At renewal". The background shows the Adobe Commerce catalog with filters for Market segment (Commercial, Education, Government), Categories (All, Document Cloud, Creative Cloud), and Type (All, Teams, Enterprise). The bottom of the screen shows a slide navigation bar with "Slide 4 of 15", "English (United States)", "Accessibility: Investigate", and a zoom level of "137%".

Open “Apply discount code” at checkout

On the checkout review screen, select Apply discount code in the order summary to attach a discount to the order.

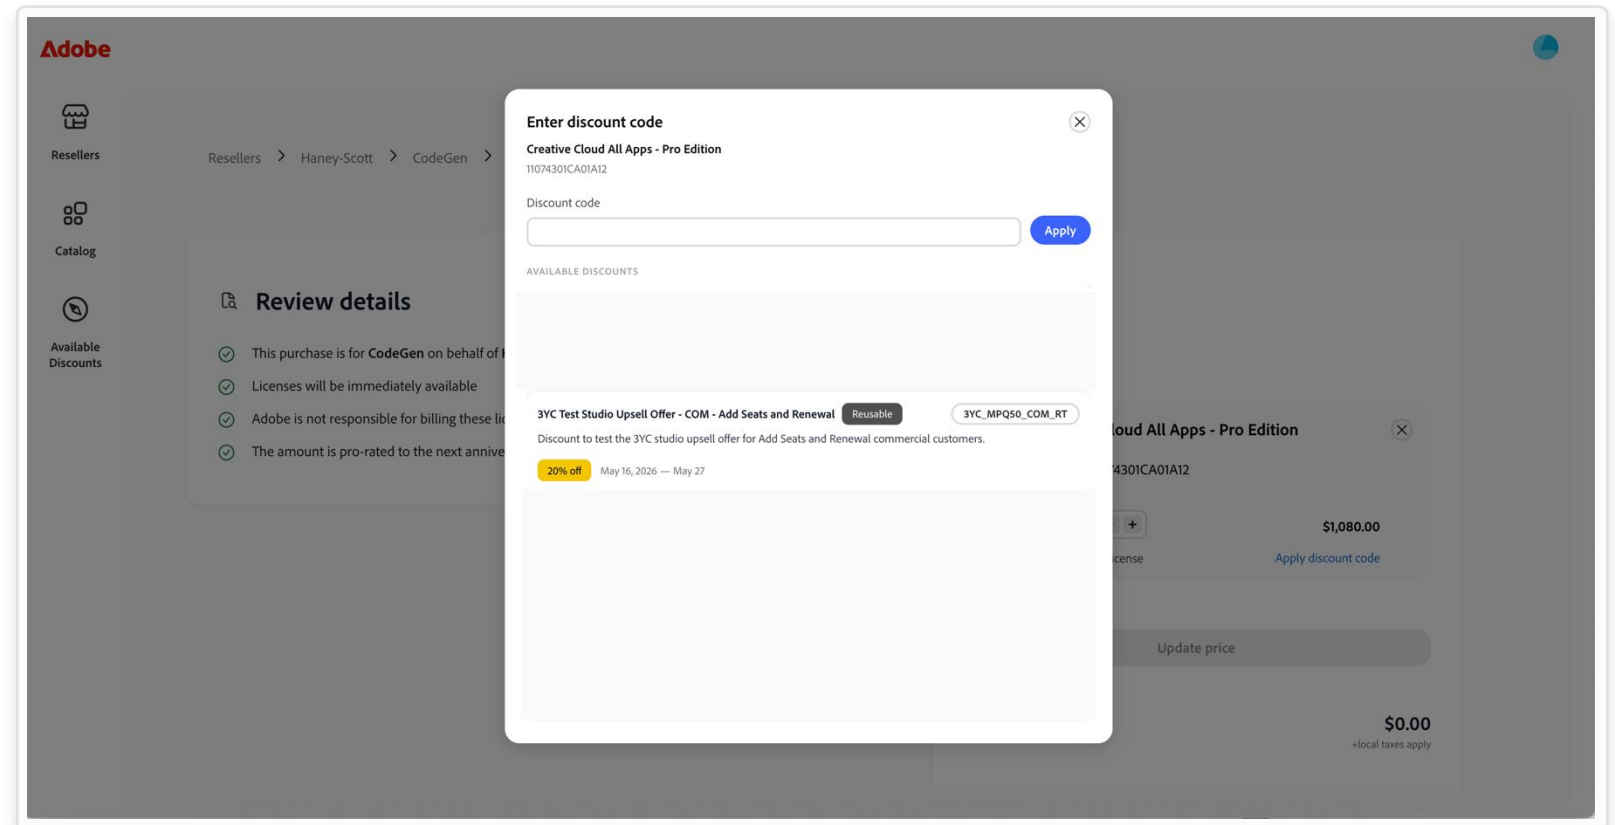

FIRST ORDER

4

Choose the 3YC discount

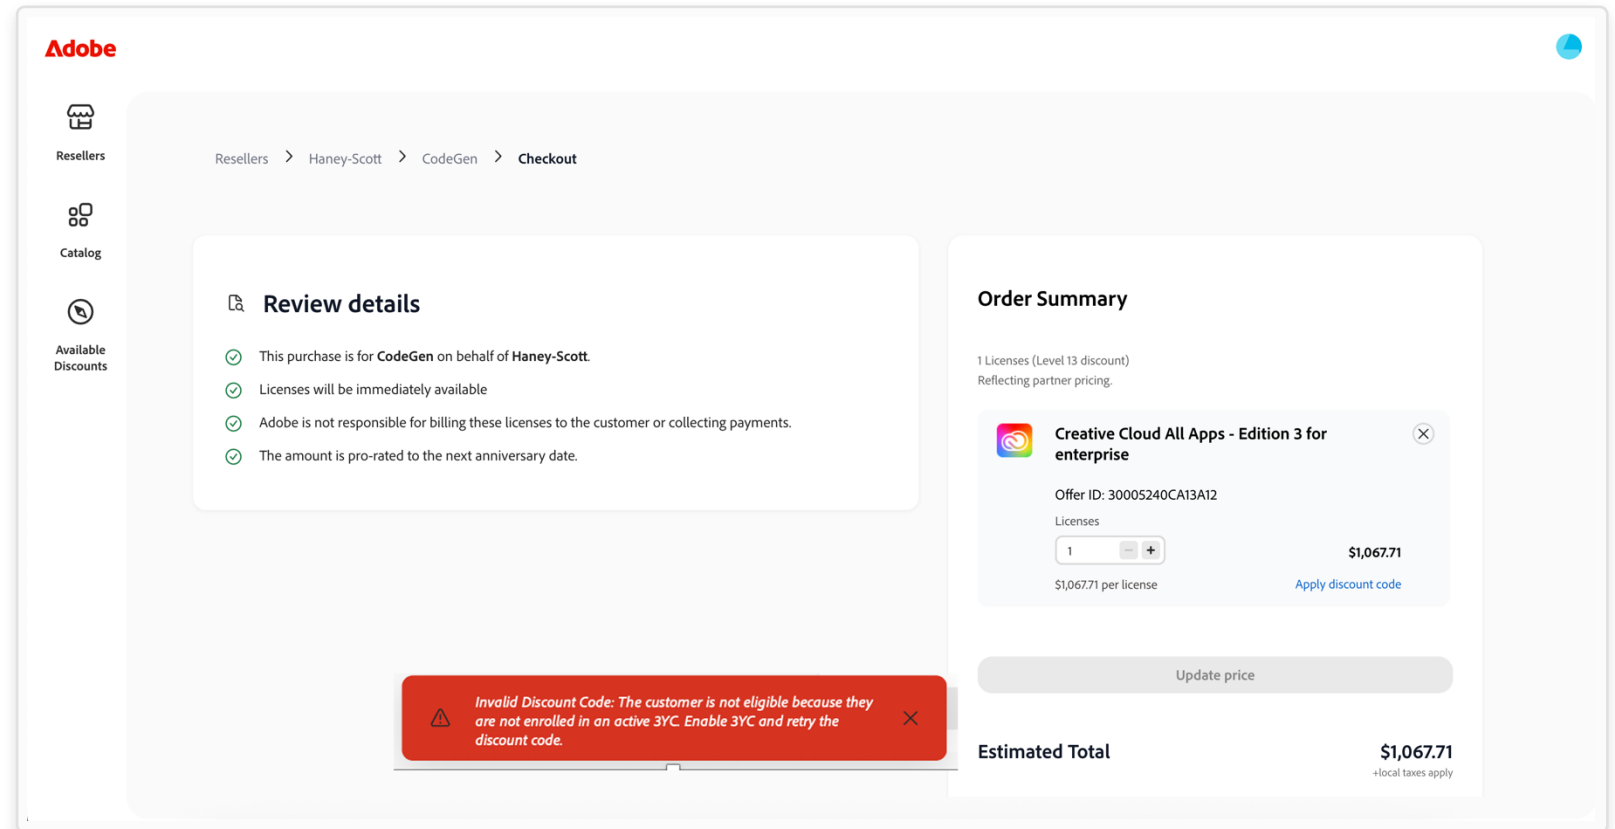

The available discounts list shows every code the order qualifies for. Select the 3YC offer to apply it.

Ineligible customer: the code is rejected

Because this customer isn't enrolled in an active 3YC, the Preview API returns an error and tells you exactly what to do next. Enroll the customer in a 3YC, then retry the discount code.

API [Preview](#)

SECTION 03

Enroll in a 3YC, then retry

With the customer enrolled and terms accepted, run the order again this time it succeeds.

RETRY

1

Enroll the customer in a 3YC

Once the customer is enrolled in a 3YC and has accepted the terms (highlighted in grey), the discount becomes available to them.

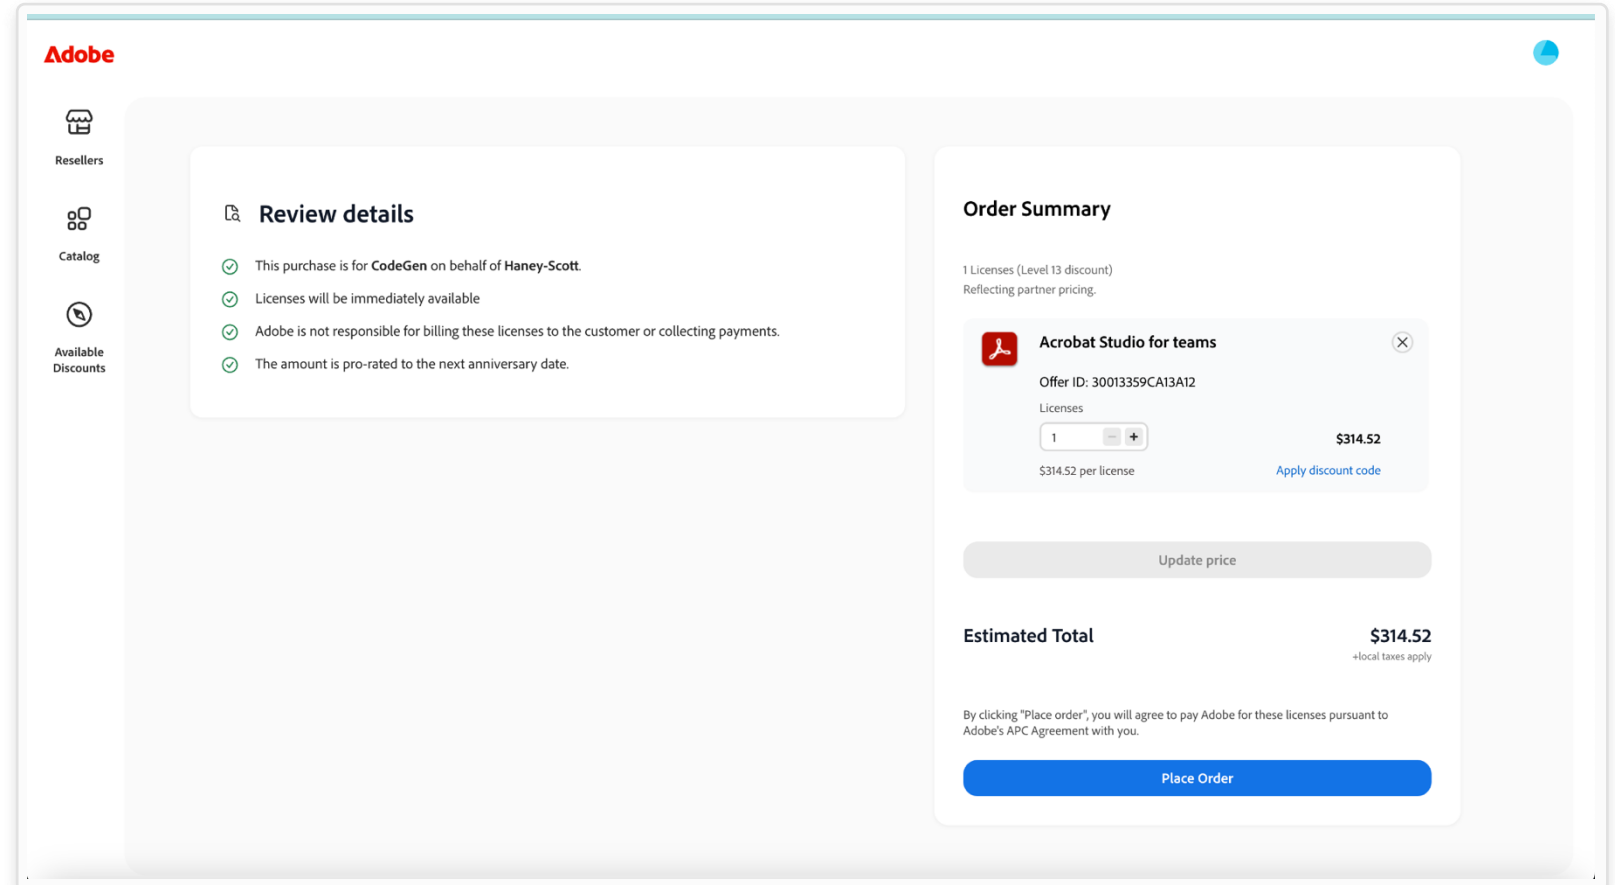

The screenshot displays the Adobe CodeGen interface for a customer. On the left is a sidebar with navigation options: Resellers, Catalog, and Available Discounts. The main content area shows the breadcrumb 'Resellers > Haney-Scott > CodeGen'. The title 'CodeGen' is followed by 'Customer ID: 1007498579'. Below this, 'Level 13 discount' is shown with a grey button labeled '3-Year Commit' circled in red. A navigation bar includes 'Products', 'Account Details', 'Purchase History', and 'Available Discounts'. A box displays 'Anniversary date: June 22, 2027 (365 days to renewal)' with an 'Edit renewal order' button. Under 'Active products', a card for 'Creative Cloud All Apps - Editio...' shows 'Auto-renewal: On', 'Status: Active', 'Partner price, Level 13', '\$1,070.64/yr per license', and 'Licenses 50 (0 in use)'. It includes 'Add licenses' and 'Upgrade' buttons. A 'Cart (1)' button is in the top right.

RETRY

2

Return to checkout and retry

Start the order again for the now-eligible customer and reopen the discount step.

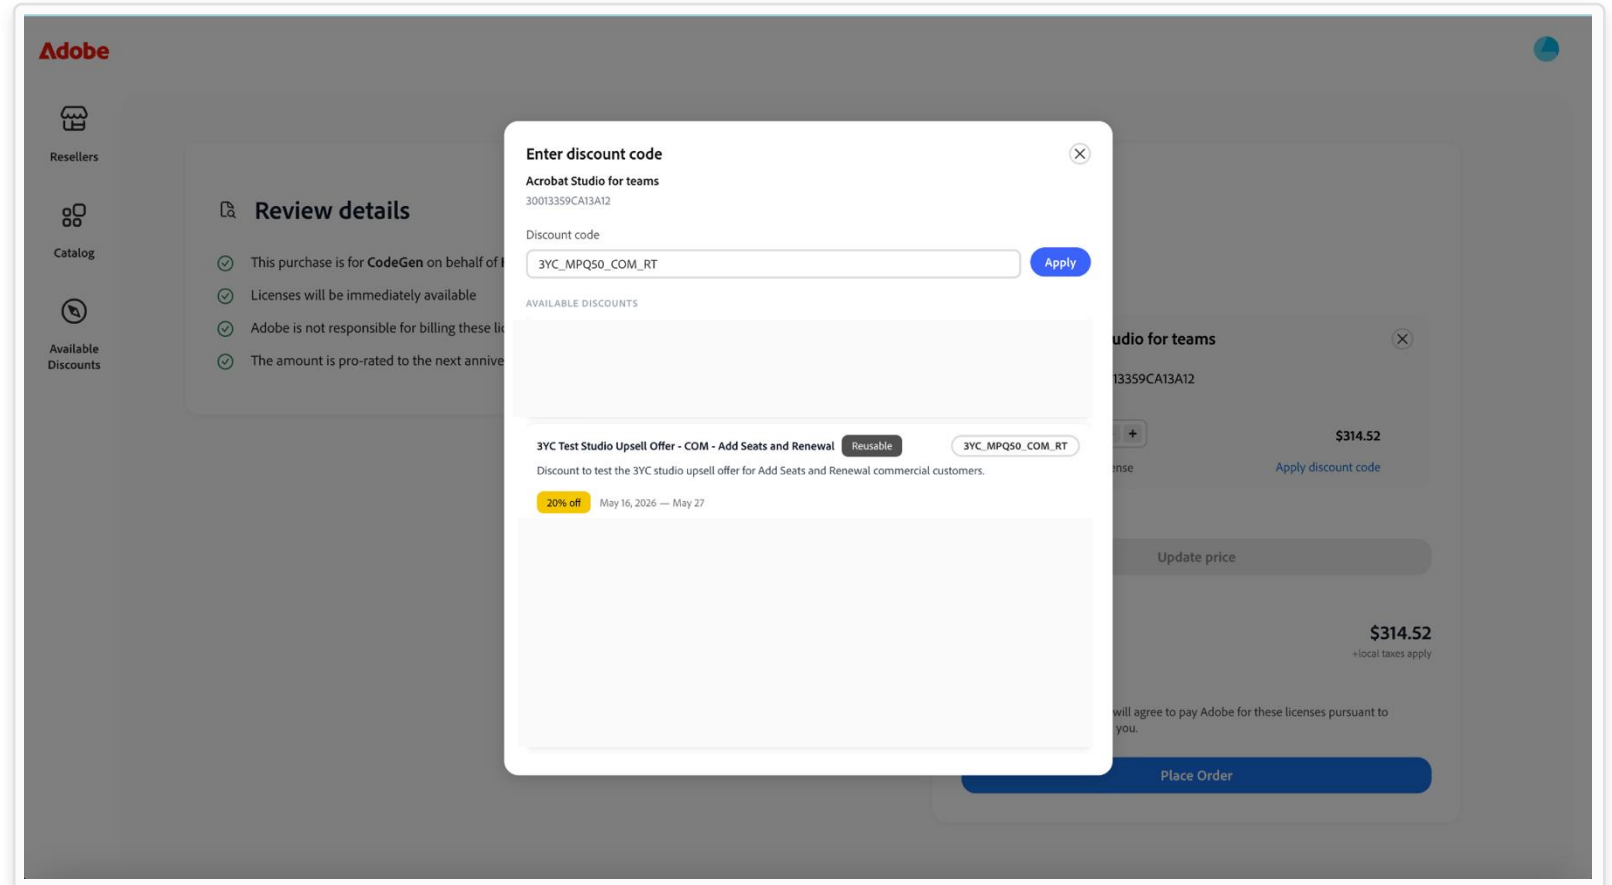

RETRY

3

Re-select the 3YC code

Choose the same 3YC discount from the available list and apply it to the order.

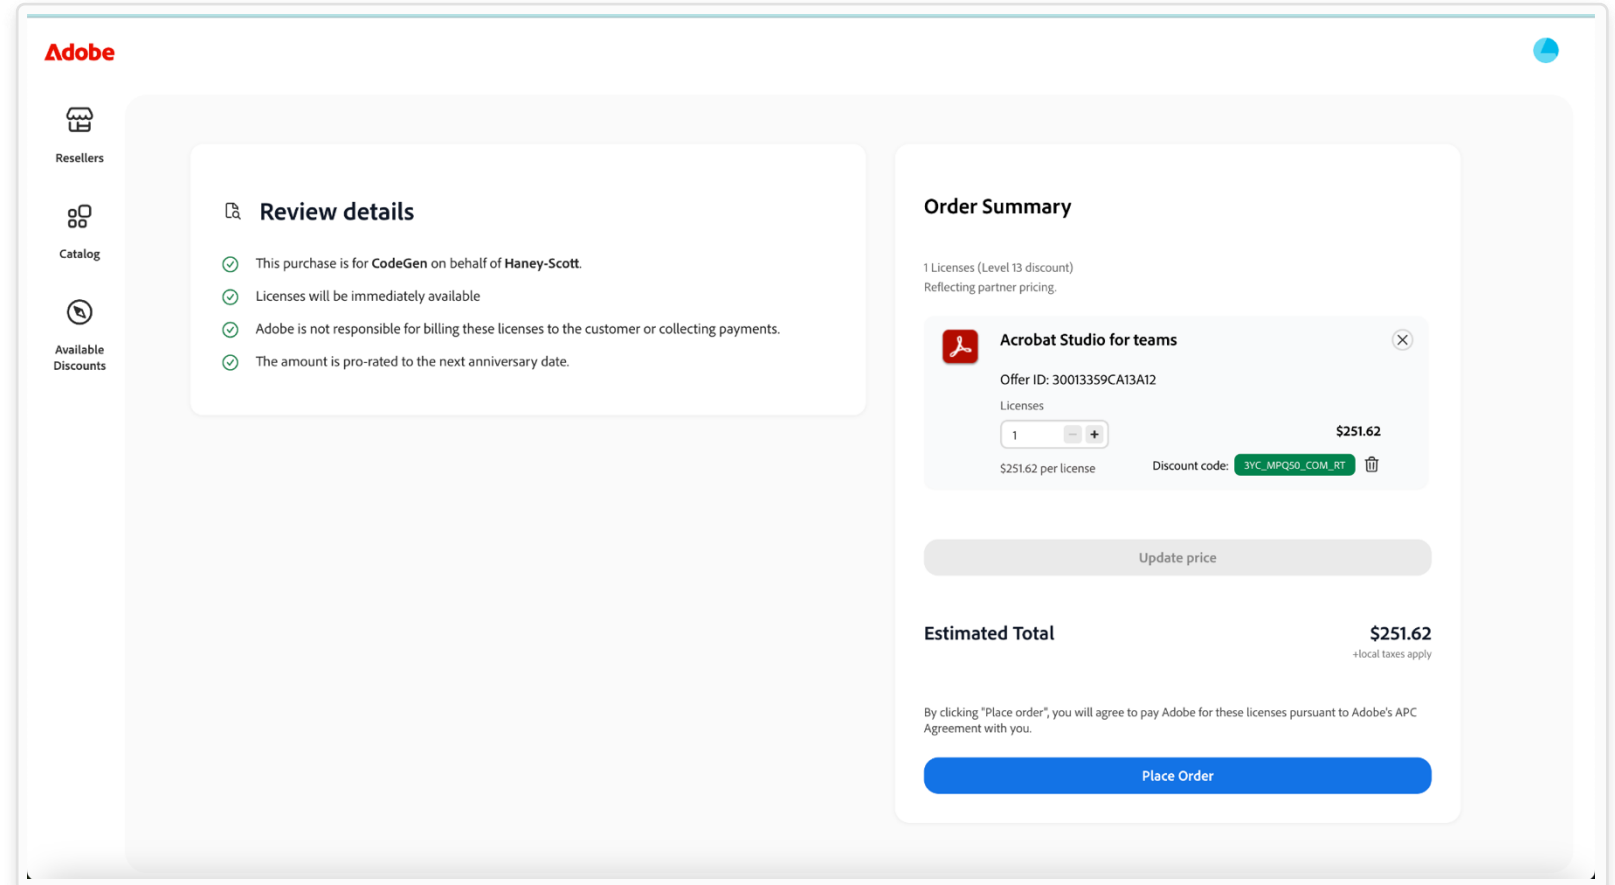

RETRY

4

Preview succeeds — the code applies

This time the Preview API validates the code with no errors and the discount is applied to the order.

API [Preview](#)

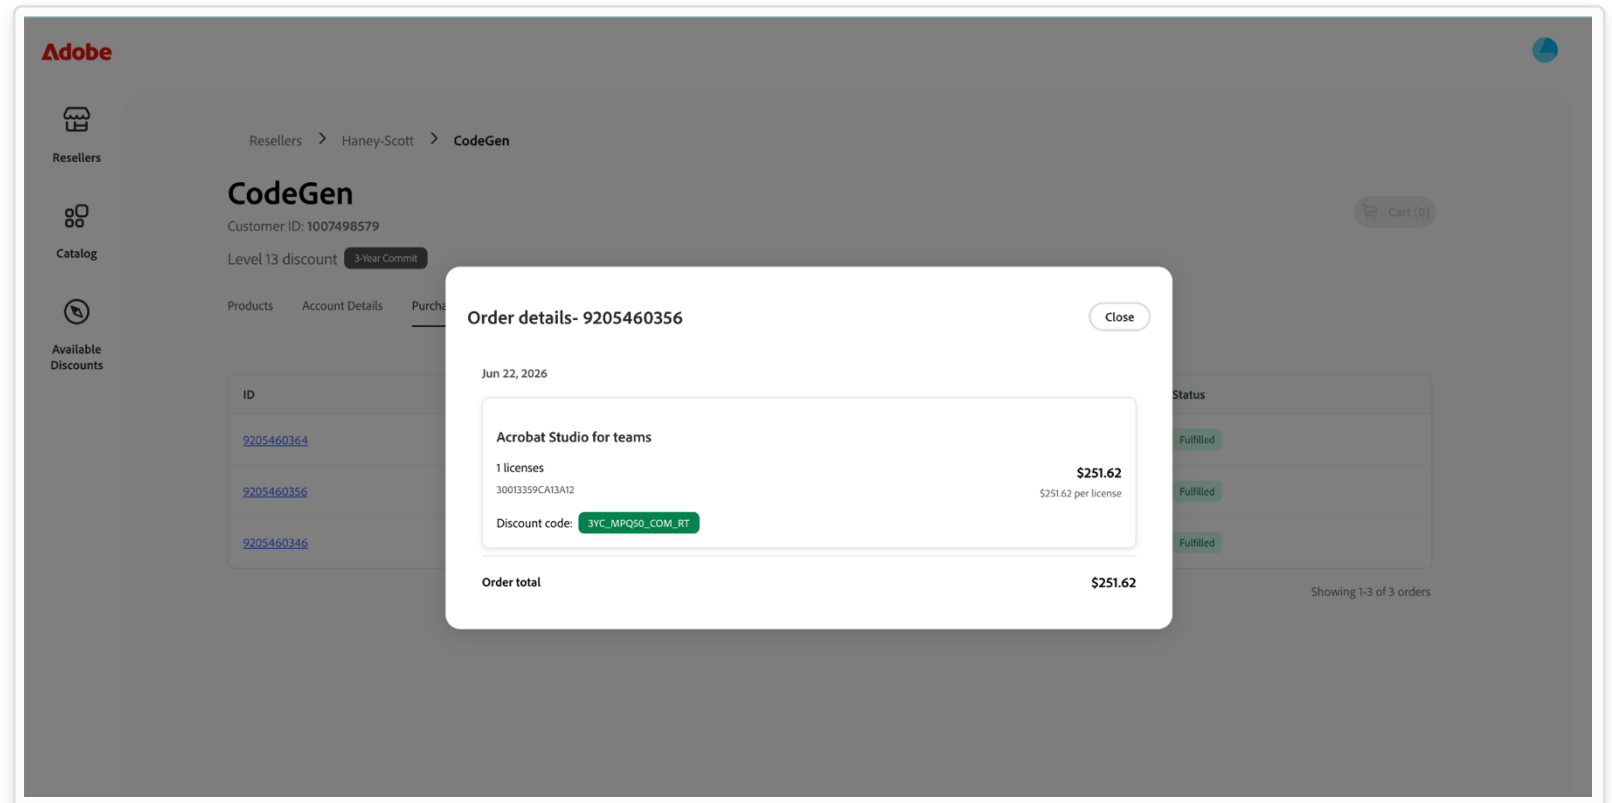

RETRY

5

Order booked with the discount

The completed order shows the 3YC discount code applied.

The same code can be reused on additional purchases — but it must be passed each time.

API [Create Order](#), [Get Order Details](#) (to verify)

SECTION 04

Auto-renewal

At renewal the discount applies automatically — no code needs to be passed.

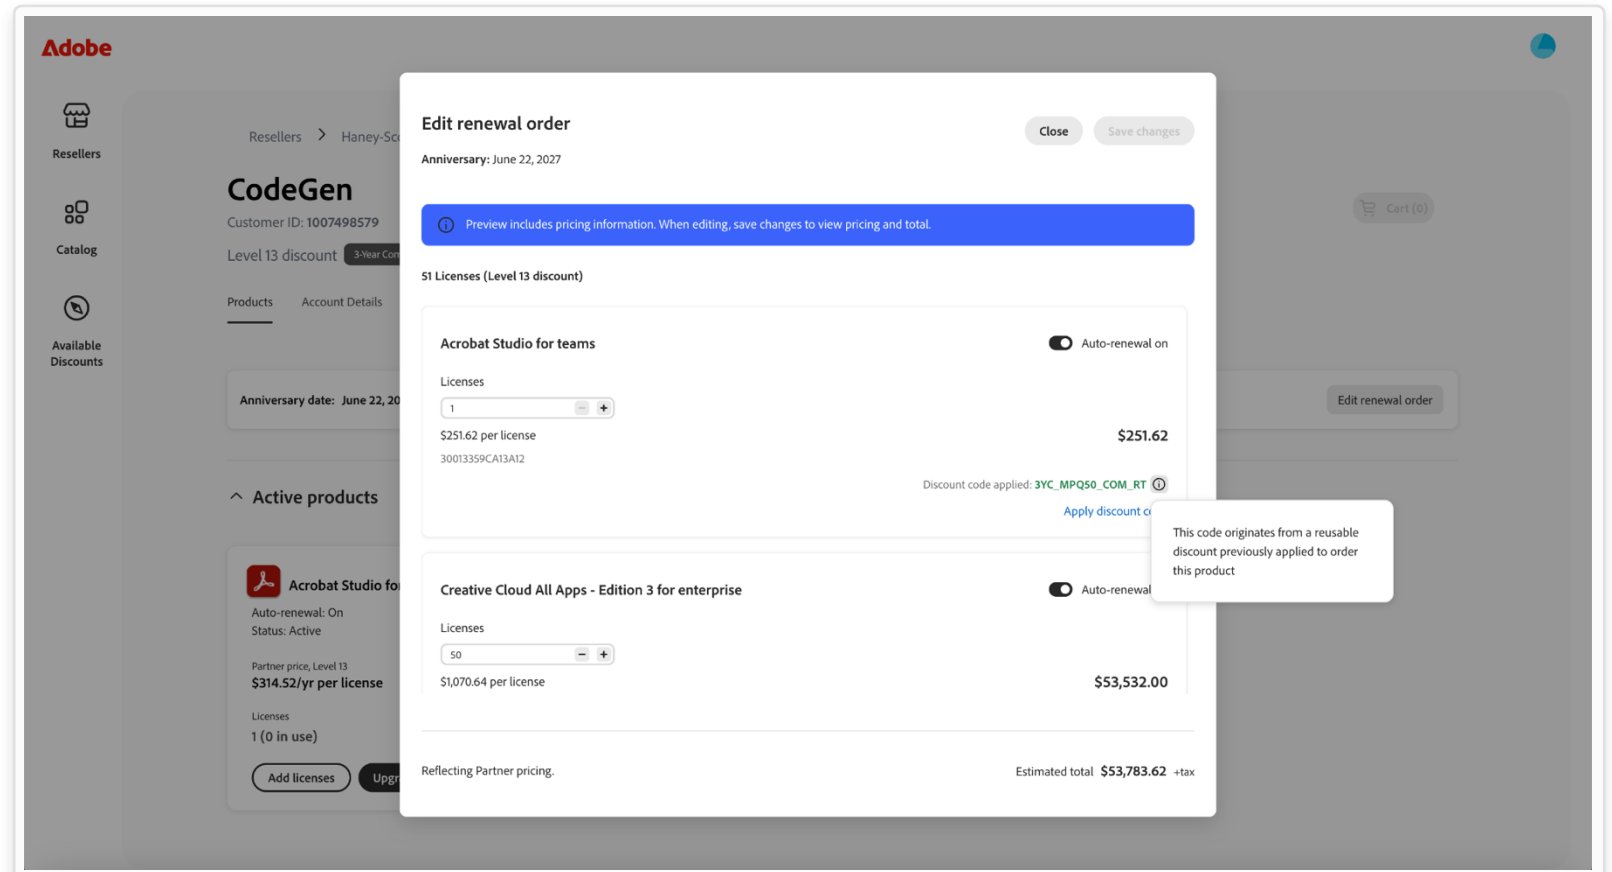

AUTO-RENEWAL

1

Renewal auto-applies the discount

When the customer enters the renewal window, the Preview Renewal API builds the renewal screen and shows that the 3YC discount will apply automatically. Unlike first and additional orders, no discount code needs to be passed for renewals.

API [Preview Renewal](#)

2

Auto-renewal order is generated

When auto-renewal triggers, the system generates the renewal order — with the discount carried through automatically (shown next).

Discount applied on the renewal order

The generated auto-renewal order shows the 3YC discount code applied — with no manual action required.

The screenshot displays the Adobe CodeGen interface. A modal window titled "Order details- 9205460364" is open, showing the following information:

- Order ID:** 9205460364
- Date:** Jun 22, 2026
- Items:**
 - Creative Cloud All Apps - Edition 3 for enterprise:** 50 licenses, \$53,532.00 (\$1,070.64 per license). License ID: 30005240CA13A12.
 - Acrobat Studio for teams:** 1 license, \$251.62 (\$251.62 per license). License ID: 30013359CA13A12.
- Discount code:** 3YC.MPQ50.COM.RT
- Order total:** \$53,783.62

The background interface shows the "CodeGen" section with a "Level 13 discount" and a "3-Year Commit" button. The left sidebar includes links for "Resellers", "Catalog", and "Available Discounts".

How the 3YC code is applied across the lifecycle

First order

Pass the code at checkout.
Eligibility is enforced. The customer must be enrolled in an active 3YC.

API [Preview](#), [Create Order](#)

Additional purchases

Pass the same reusable code on each new order for the customer.

API [Preview](#), [Create Order](#)

Auto-renewal

No code needed — the discount applies automatically at renewal.

API [Preview Renewal](#)

Across all three, discovery of available codes is powered by the [Get Flex Discounts](#) API.
